PROFESSIONAL SUMMARY

AI & ML Engineering candidate with hands-on experience building multi-agent LangGraph workflows, RAG applications, FastAPI-based AI services, data pipelines and SQL-driven analytics. Skilled in Generative AI, LLM applications and backend engineering, with a production-oriented approach: outputs checked in code, human approval steps, and runs that recover from failures.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

Python Concepts: Object-Oriented Programming (OOP), Functions, Modules & Packages, File Handling, Exception Handling, Decorators, Generators, Context Managers, Type Hinting

AI/ML & Generative AI: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Document Embeddings, Vector Search, Prompt Engineering, Generative AI, Groq API

Backend Engineering: FastAPI, REST APIs, API Design, Pydantic

Cloud & DevOps: Git, Docker, Docker Compose, Kubernetes, AWS (ECR, ECS)

Data & BI: Pandas, NumPy, Matplotlib, EDA, Feature Engineering, Data Pipelines, Power BI, Tableau

EXPERIENCE

AI Engineer Intern – Santerra Hygiene Pvt. Ltd.

July 31, 2026 – Present

- Build AI-powered automation workflows and practical AI applications using Python, prompt engineering, and model integration to streamline a startup's business operations.
- Support business data and finance-related processes, applying automation to improve the efficiency and scalability of daily operational workflows.

Data Analyst Intern – Think AI Corporation

April 15, 2026 – July 15, 2026

- Migrated legacy reports to Power BI and Tableau, building interactive dashboards to visualize key business metrics and support decision-making.
- Performed data analysis/EDA using Python and SQL, and designed data pipelines to clean and transform multi-source data into BI-ready formats while gathering requirements with cross-functional teams.

PROJECTS

Multi-Agent Research Paper Writer | LangGraph · Multi-Agent · Citation Verification · Human-in-the-loop

- Built a LangGraph workflow of seven specialist agents that turns an assignment brief into a cited research paper. Every citation is verified against Crossref in code, a human approves the topic and thesis before drafting, and runs are checkpointed in Postgres so they resume after crashes. Live: research-paper-agents.vercel.app

Multi-Agent Resume Optimizer | Agentic AI · Document Intelligence · LLM · Tool Calling

- Built a LangGraph-orchestrated multi-agent resume screening system combining Pydantic-structured LLM outputs, tool calling, deterministic ATS checks, and evidence-grounded LLM scoring for skill matching, fit assessment, and gap analysis.

AI Research Assistant | FastAPI · LangChain · RAG

- Engineered a FastAPI and LangChain-based RAG application with end-to-end document ingestion, chunking, vector retrieval, and LLM-powered response synthesis that answers only from retrieved passages and cites its source.

TRAINING & CERTIFICATIONS

- Oracle Certified Agentic AI Foundations Associate** – Oracle (Credential ID 103539377AAI26OFA) **Sep 2026**
- Programming with Python Professional Certificate** – OpenEDG Python Institute
- Generative AI, RAG, Multimodal & Agentic AI** – CSE (AI & ML) Dept., Acropolis Institute of Technology and Research, with Navigate Labs

EDUCATION

Bachelor of Technology (B.Tech.) – Computer Science Engineering (AI & ML)

2023 – 2027

Acropolis Institute of Technology and Research, Indore (Affiliated to RGPV Bhopal), CGPA: 7.94

- HSC - Shri Vidya Sagar Public School, Khategaon (MP Board), 81.4% **2023**
- SSC - St. Thomas School, Ujjain (ICSE Board), 94.1% **2021**
